

INTROSPECT™ Behavioural Risk Report

Trader Discipline Assessment | www.intradaymindview.com

OVERALL RISK LEVEL: MEDIUM

You demonstrate good emotional stability and strong rule consistency during normal market conditions. However, under pressure, risk management discipline becomes inconsistent — particularly in position sizing and stop-loss execution. Your primary vulnerability is inconsistent risk structuring during high-conviction situations.

Category	Risk Level	Key Observation
Stop-Loss & Loss Response	Medium	Occasional stop widening and emotional reactions after losses
Behaviour After Profits	Low	Stable and disciplined after profitable trades
Risk Planning & Positioning	High	Inconsistent position sizing and undefined ■ risk
Impulse & Over-Participation	Low	Strong patience and low FOMO behaviour
Rule Consistency	Low	High adherence to trading rules and process

PRIMARY BEHAVIOURAL RISKS

Risk Planning & Positioning → HIGH RISK

- Trades sometimes entered without predefined ■ risk
- Position sizing lacks mathematical consistency
- Higher leverage used during strong conviction trades

Mandatory Corrections:

- ✓ Risk fixed 1% per trade
- ✓ Define stop-loss before entry
- ✓ Use pre-trade quantity calculator
- ✓ Avoid discretionary leverage increases

Stop-Loss & Loss Response → MEDIUM RISK

- Stop-losses occasionally widened emotionally
- Consecutive losses can trigger frustration-based decisions

Mandatory Corrections:

- ✓ Place hard stop-loss orders immediately
- ✓ Review every losing trade objectively
- ✓ Pause after emotional losses

CORE STRENGTHS

- ✓ Stable after profitable trades
- ✓ Strong patience and setup selectivity
- ✓ Minimal FOMO behaviour
- ✓ High rule consistency and disciplined execution

FINAL PERFORMANCE INSIGHT

Your next level of growth will come from improving risk consistency, mechanical execution, and capital protection habits. You already possess patience and emotional awareness — now the focus is building a fully standardized risk framework.
